About the Author

Jakub Przybolewski

Ever since I remember, graphic has been my passion. I was interested in drawing cars as a child. When I grew up creating automotive objects in 3d space became my biggest hobby. I started my romance with a CGI in 2004 after watching one of television programs called Animaster.

Nowadays I live in Silesia (Poland), working as freelancer in many graphic areas (3d modelling, post production, animation etc.) improving and expanding my experience all the time. I like photography, traveling and listening independent music.

Feel free to have a look at my portfolio:

Designed for visualizations

Smart polygon distribution

Our 3d models are designed with care for your resources. There is no spear polygons. Wire is only dense where it is needed.

No displacements

Better stability, less ram consumption, faster rendering.

Single element objects

No need of attaching spread elements. Every object is already single element witch multi material.

Clear naming Easily find and manipulate your objects in large scenes.

Made for LWF

From very beginning all our models are prepared to work great in Linear Workflow.

High quality shaders

Every shader is prepared witch care. So even simple objects look great and detailed.

Optimized lighting sources

Our shops models using VrayLight material for lighting. This solution works much faster in large scenes witch multiple light sources.
